SKILLS

React.js, HTML5, CSS3, SCSS, JavaScript (ES6+), Bootstrap, Tailwind CSS, CSS Modules, Git/GitHub, Responsive Design, Basic UI/UX

WORK EXPERIENCE

Locafy Team

Frontend Developer

Jan 2024 - Present

- Built responsive UI using React, Tailwind, CSS Modules
- Implemented new features and UX improvements
- Handled Git/GitHub versioning

River Bank Training

Frontend Developer

Aug 2023 - Dec 2023

- Created digital campus navigation UI
- Collaborated on project planning
- Strengthened teamwork in real-world development

PROJECTS

Expense Tracker App

JavaScript

- A lightweight and fully interactive expense management tool built with vanilla JavaScript. Features include adding, editing, categorizing, and deleting expenses with real-time DOM updates, total balance calculation, and localStorage persistence.

E-Commerce Website – Jumia Clone

HTML, SCSS, JavaScript, React

- A functional replica of the Jumia online marketplace with product listings, category filtering, search functionality, responsive pages, and an interactive cart system.

React Weather App

- A responsive weather forecasting application integrated with a real-time weather API. Users can search any city to view temperature, humidity, wind speed, and conditions.

Small-Scale Business Management App

React

- A React-based management tool for small business operations including inventory, sales tracking, customer management, and reporting dashboards. — In Progress
